Web3.0

Wallet

Try Pitch

Our mission —

To democratize blockchain access and empower users with a decentralized, user-friendly wallet. Our goal is to simplify token creation, promote financial inclusivity, and contribute to a greener digital future.

The problem —

Investors and crypto enthusiasts often face the challenge of safeguarding their digital assets due to the **vulnerability of centralized exchanges** and the lack of control over **emotional trading** behaviors. Moreover, the absence of a platform allowing the integration of **customized smart contracts** into a mobile app limits users' ability to tailor their crypto experience.

Centralized exchange/hot wallet vulnerabilities

80%

Traders lose money in the long run due to green level in the centralized exchanges and hot wallets.

40%

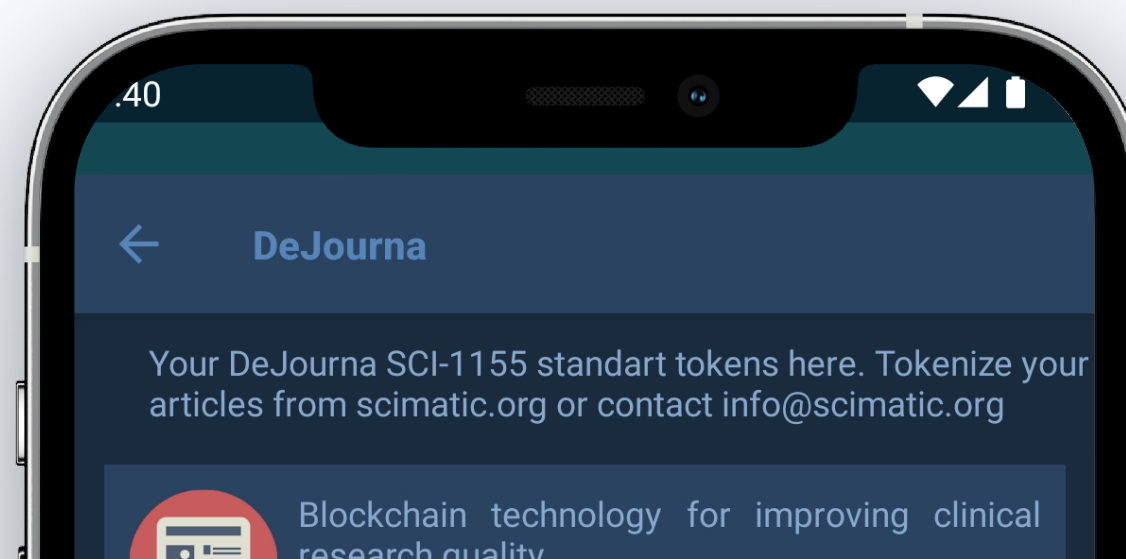

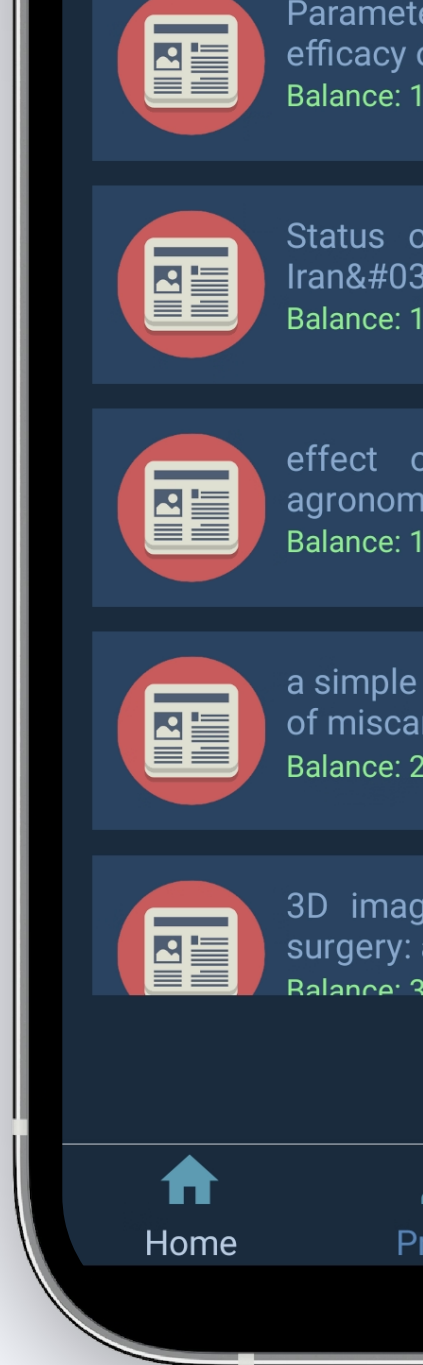

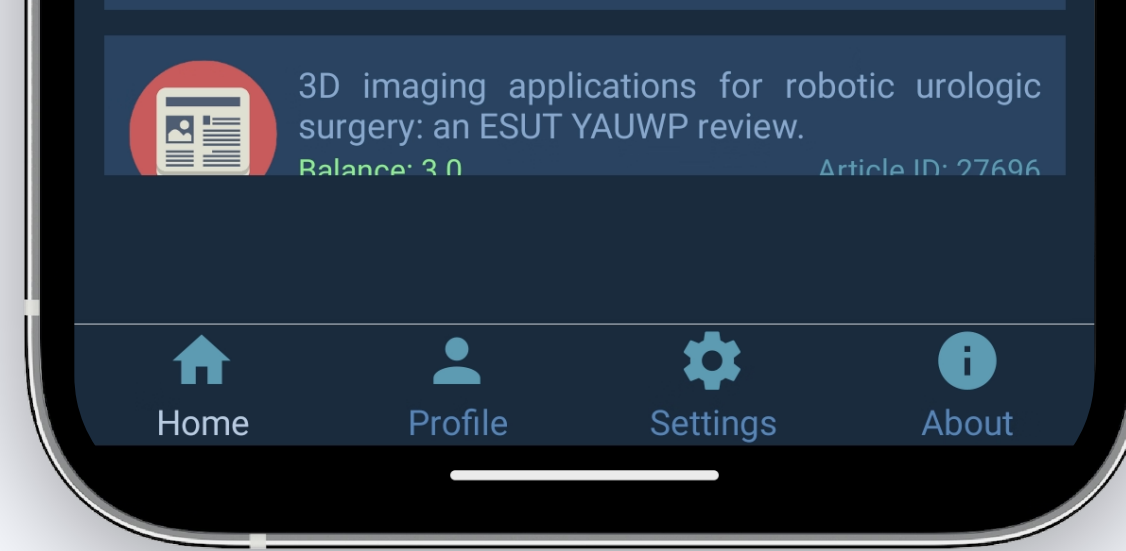

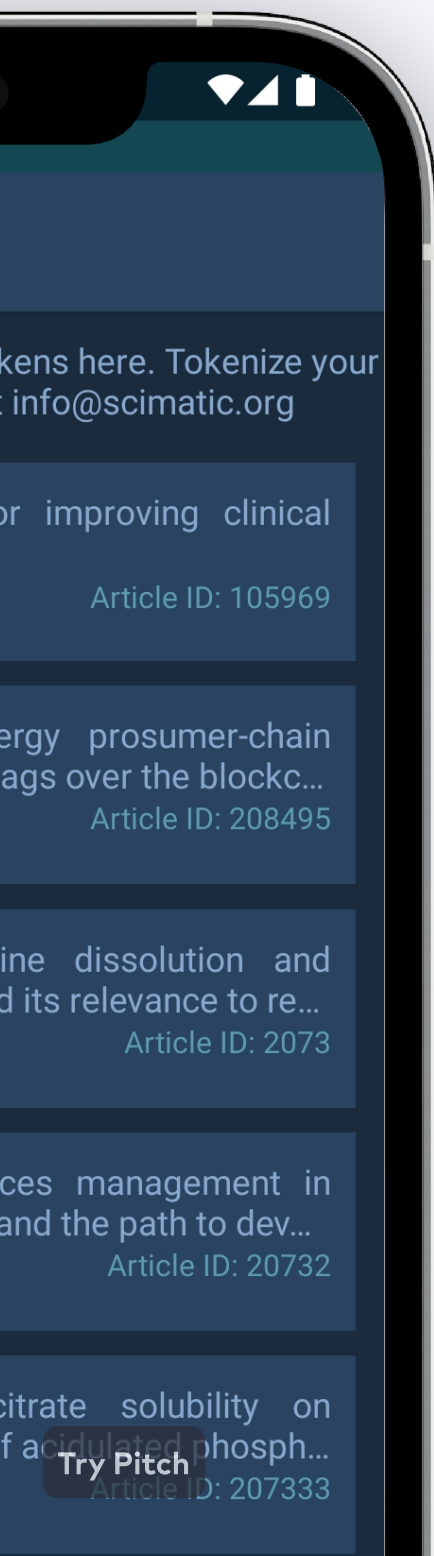

of crypto owners sold their holdings during the 2018 market crash due to panic levels.

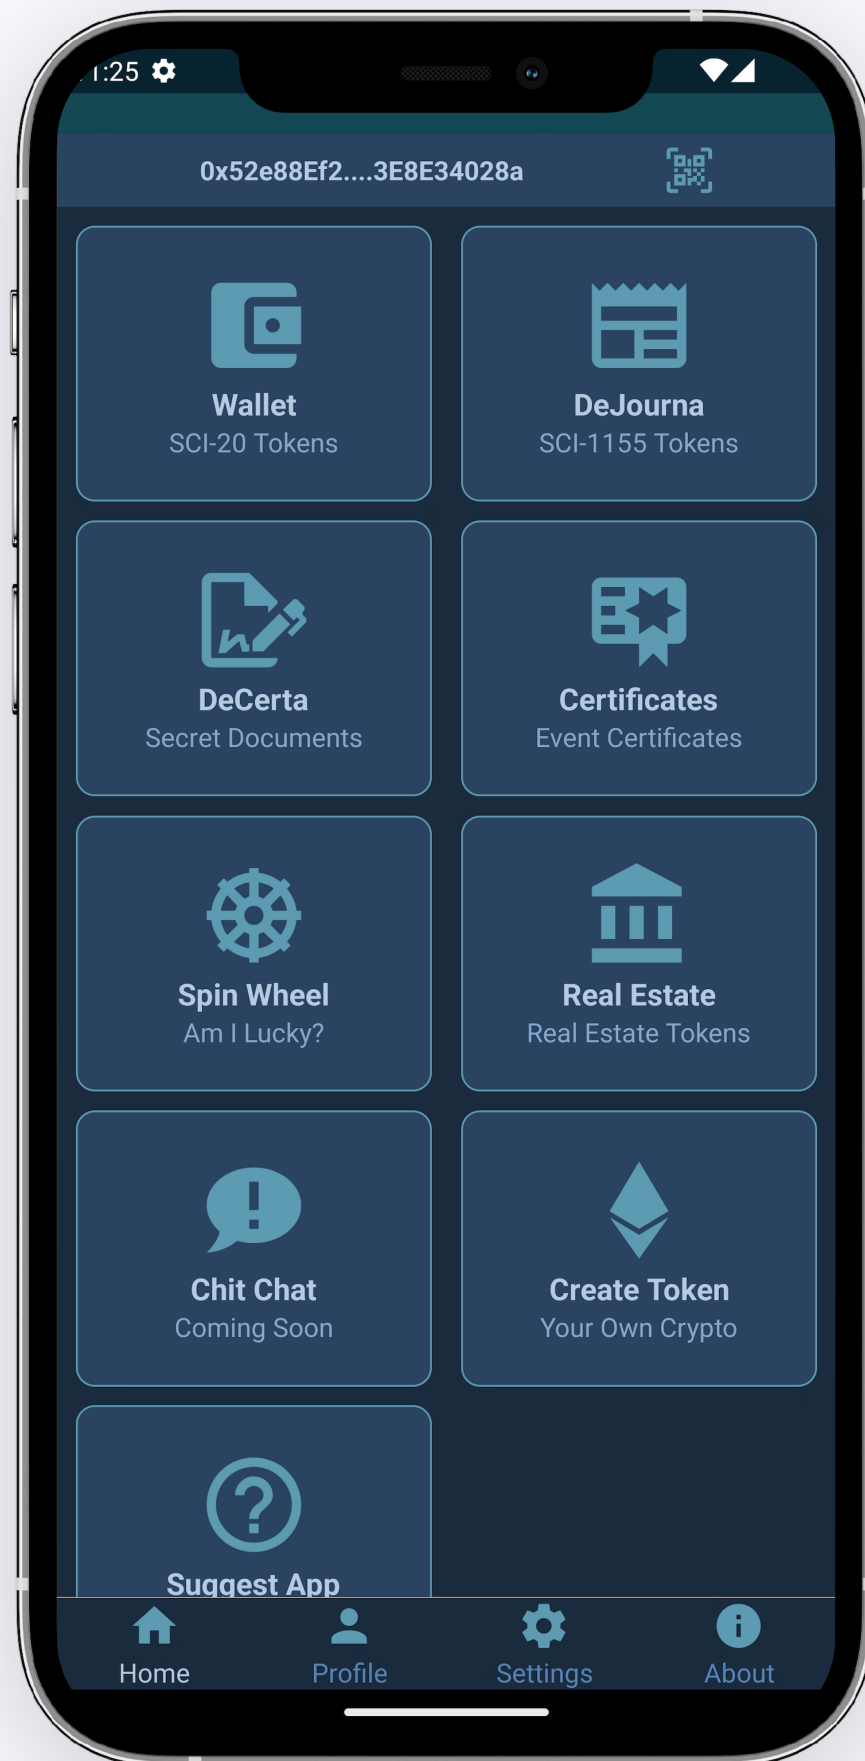

\$3 billion

worth of cryptocurrency was lost in scams and hacks in 2021, mostly centralized exchanges.

Saymatik Web3.0 Wallet

A decentralized cold wallet ensuring asset protection and empowering users to integrate personalized smart contracts on their mobile devices.

Solution

Saymatik Web3.0 Wallet

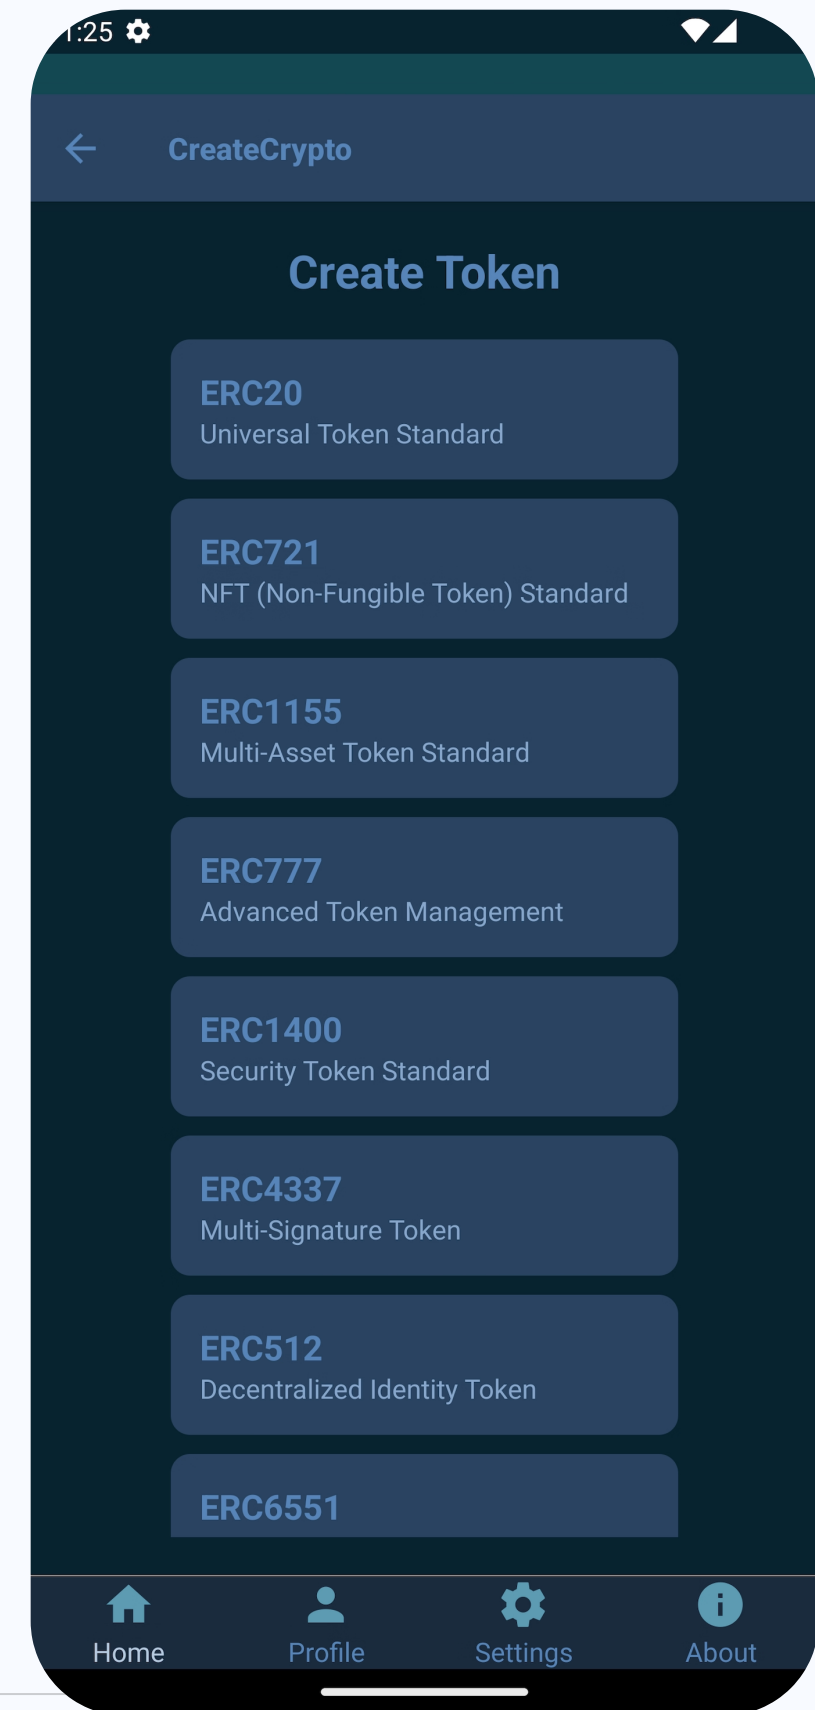

- Decentralized cold wallet
- Ensuring enhanced security
- Reducing the risk of asset loss

Allowing users to

- Integrate and customize smart contracts directly through the mobile app,
- Providing unparalleled control and customization in the management of cryptoassets.

Market potential —

Saymatik Web3.0 Wallet taps into the surging demand for decentralized solutions, offering a pioneering platform in the burgeoning market of crypto security and customizable smart contracts, promising lucrative returns for savvy investors.

Web3.0 Dapps
DeJourna = 2 ETH
DeCerta / Events = 7 ETH
Real Estate / Others = 7 ETH
Others = 16 ETH

\$40,468/year

Competitive advantages

Decentralized Multichain Support:

1

Saymatik Web3.0 Wallet stands out with its decentralized architecture and multichain support, including Scimatic, Ethereum, Binance Smart Chain, Avalanche, and Polygon. This flexibility allows users to seamlessly interact with various blockchain networks.

Token Creation Without Coding

2

A distinctive feature is the ability to create ERC20 and ERC721 tokens without any coding knowledge. This empowers users to tokenize assets or create custom tokens for specific purposes directly within the wallet.

Innovative Tokenization Use Cases

3

The wallet introduces innovative tokenization use cases, such as storing scientific articles as modified ERC1155 tokens, creating blockchain-based events with smart contract-based attendance certificates, and exploring real estate tokenization. These unique functionalities set Saymatik apart in the blockchain ecosystem.

Saymatik Web3.0 Wallet

Saymatik wallet is designed to provide services to the web3.0 and web5.0 based products released on the SciMatic Hybrid Blockchain (scimatic.net) and controlled by smart contracts.

Saymatik Wallet: Keep your coins and tokens safe in a decentralized fashion. Scimatic, Ethereum, Binance, Avalanche, Polygon and more networks are supported.

DeCerta is a decentralized certification and documentation system. Keep your documents in a hybrid of web2.0 and web3.0 (web5.0) way, own your data completely.

Luck Wheel: Try your luck to earn SCI coin.

IDIDIT: I did it, secure your thoughts and ideas in the blockchain to prove your intellectual property rights. No more lengthy processes for patents.

Chit Chat: Blockchain based chat. Completely private and secure.

Locker: If you cannot control your greed and panic levels, and losing cryptos in the exchanges, time lock your assets.
